Nexus Onboarding - Survey Test Plan | Prepared by Jordan Lee

Summary

This plan covers a survey of new Nexus workspace admins at day 30 after signup. The study exists to learn where new admins stall in their first month, so the team can decide which onboarding fixes to build next and whether the invite flow needs a guided first run. The survey is run by the Nexus product research team, and its readout feeds the onboarding roadmap review in November 2026.

Timeline

Preparation (plan created)	October 12, 2026
Live (date study goes live)	November 3 to November 17, 2026
Readout (data analysis, findings report)	November 13, 2026

Objectives

Goal	Success Criteria
Learn where new admins stall during their first month	At least 200 completed responses, with stall points ranked by frequency, so the team can pick the top three fixes
Judge whether the invite flow is understandable to new admins	Responses split cleanly between admins whose first invitation was accepted and admins whose was not, so the two groups' setup ratings can be compared
Decide whether the onboarding email sequence helps or annoys	The team feels confident about the email sequence after the readout

Hypotheses

- Admins who invite a teammate in their first week will report higher satisfaction at day 30 than admins who work alone.
- The setup checklist is the onboarding aid new admins use most.
- New admins find the pricing page confusing, and it slows down their setup.

Participants

Workspace admins whose Nexus trial or subscription began thirty days before the send date, including admins who created a workspace but have not yet started a project. Invitations go to the account owner's email.

Psychographic	Region	Age	Gender
Team leads and operations-minded organizers who set up tools for their teams	North America and Europe	25 to 54	All

Methodology

The survey is emailed to the day-30 cohort on the live date, with one reminder after seven days. It has fourteen closed questions and two open questions and takes about six minutes. Questions use the formats in the table below. Responses are stored in the research repository, reported in aggregate, and no individual response is quoted with a name attached.

Questions

Question	Possible Answer(s)/Format	To Determine
How would you rate your overall experience with Nexus so far?	Single answer: Very satisfied / Satisfied / Neither satisfied nor dissatisfied / Dissatisfied / Very dissatisfied	An indicator of how satisfied people are with their experience on the product
How much did you enjoy using Nexus in your first month?	Single answer: A lot / A little / Not at all	How positive the first month felt
Was setting up your workspace fast and easy to understand?	Single answer: Yes / No	Whether setup reads as quick and clear
In your first month, which of these did you use?	Multiple answer: Setup checklist / Templates / Invite a teammate / Automations / None of these	Which onboarding aids admins actually touch
How many teammates have you invited to your workspace?	Single answer: 0 / 1 to 2 / 3 to 5 / 6 or more	Whether the admin has crossed the invite step at all
	Single answer: Very fair / Somewhat fair / Neither fair nor	Whether pricing expectations set by the

Question	Possible Answer(s)/Format	To Determine
How fair do you think Nexus pricing is for a team your size?	unfair / Somewhat unfair / Very unfair	pricing page match the first month's experience
What nearly stopped you from finishing setup?	Open text	The stall points the closed questions did not anticipate
